USER MANUAL

1. Explanation of symbols

Important information regarding operation and maintenance. Failure to follow these instructions may result in personal injury, death, or property damage.

Before using the device, please read the operating instructions carefully.

Tips and additional information.

Before using the appliance, please read this instruction manual carefully. Keep this manual for future reference. The manufacturer shall not be held liable for any damage resulting from use not in accordance with the intended purpose or from improper operation.

The warnings and important safety information contained in this instruction manual do not cover all possible conditions and situations that may occur. The user is responsible for exercising caution and sound judgment when operating and maintaining the appliance.

Please send warranty claims to the following email address: pomoc@yolco.pl
When contacting an authorised service centre, please have the following information ready: model information and the serial number. This information can be found on the rating plate.

The contents of this instruction manual are subject to change without prior notice. The latest version is always available at: www.yolco.pl

2. Safety information

• This appliance may be used by children aged 8 years and above and by persons with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, provided that they are supervised or have been given instruction concerning the safe use of the appliance and understand the hazards involved. Children shall not play with the appliance. Cleaning and maintenance shall not be carried out by children without supervision.

2. Safety information cont.

• Do not use the appliance or its power cords if they show signs of damage. If the appliance or its power cord requires repair, contact the manufacturer, an authorised service centre, or another qualified person. Attempting repairs on your own may result in serious danger to health or life.

• The appliance must be connected to a power supply that complies with the data specified in the technical specifications, using only the supplied power cords.

• Always disconnect the appliance from the power supply after each use and before cleaning or maintenance. Do not unplug the appliance by pulling on the power cord, as this may cause damage.

• Protect the appliance from water splashes and adverse weather conditions such as rain. Do not immerse the appliance in water or any other liquid. The appliance is not waterproof. Do not operate the appliance with wet hands.

• Disassembly of the appliance or any interference with its internal structure by the user is prohibited.

• Do not insert any objects into the appliance through the air inlet or outlet openings.

• Do not use the appliance if sand, stones, or other small objects have entered its interior.

• Do not direct the appliance outlets towards the eyes or other sensitive parts of the body.

• Store the appliance in a dry and cool place.

3. Contents of the package

• Electric air pump
• Connection hoose
• Nozzle set (x4)
• User manual

4. Construction of the device

5. Operating Information

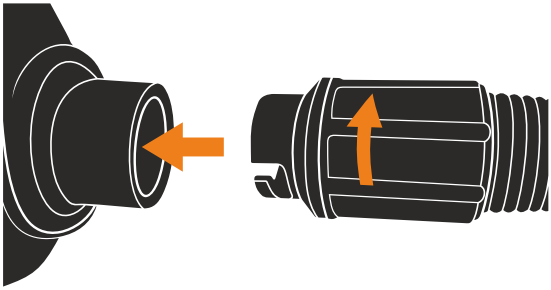

Warning! To prevent the appliance from overheating, switch it off for 5 minutes after every 30 minutes of operation.

5.1 Inflation

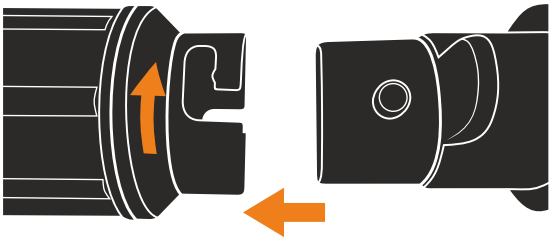

Warning! Before starting inflation, make sure that the item to be inflated is not damaged, is placed on a flat and stable surface, the valve is properly installed, and the pump nozzle is suitable for the type of valve.

5. Operating Information cont.

1. Insert the end of the connection hose into the outlet opening in the housing and turn it clockwise.

2. Insert the appropriate nozzle into the other end of the connection hose and turn it clockwise.

3. Connect the appliance to a power outlet and switch it on using the On/Off switch.
4. After inflation is complete, switch off the appliance and disconnect it from the power supply. The device will not turn off automatically.
5. To disconnect the nozzle and the connection hose, turn them counterclockwise.

5.2 Deflation

1. Insert the end of the connection hose into the inlet opening in the housing and turn it clockwise.
2. Insert the appropriate nozzle into the other end of the connection hose and turn it clockwise.
3. Connect the appliance to a power outlet and switch it on using the On/Off switch.
4. After deflation is complete, switch off the appliance and disconnect it from the power supply. The device will not turn off automatically.
5. To disconnect the nozzle and the connection hose, turn them counterclockwise.

6. Cleaning and Maintenance

• Clean the electric air pump housing (excluding the inlet and outlet openings) with a dry or slightly damp soft cloth. Do not use detergents.
• Store the appliance in a dry and cool place.

7. Technical specification

• Rated voltage: 220-240V ~ 50/60Hz
• Rated current: 2,3A
• Rated power: 500W
• Operating pressure: 2,2 PSI
• Power cord length: 1330 mm
• Dimensions (W x H x D): 170 x 130 x 114 mm
• Net weight: 0,73 kg

The crossed-out wheeled bin symbol indicates that this product must not be disposed of with other household waste. Used electrical and electronic equipment should be taken to appropriate collection points for recycling in accordance with national environmental regulations for waste management. Selective collection of waste helps to reduce the potential negative impact on human health and the environment caused by hazardous substances, mixtures, and components present in the equipment.
